Blood Bank Refrigerators according to DIN 58371
Blood Plasma Freezers according to DIN 58375
Patrick Bürkle
The third generation of his family to be employed at KIRSCH

“We have always manufactured with the utmost care in order to guarantee the highest quality. This is what our customers value.”
Innovation and quality since 1865.

Trust
Since 1865, we have been synonymous with high-quality products fulfilling the most stringent standards and providing the highest level of reliability. Since then, we have won over your trust through consistent innovation, quality and service. This enabled our company to manage even the more turbulent times in world history. This demonstrates: your trust is the foundation for our long-term success. We will continue to pursue this path on a permanent basis. For example, our excellent product features are certified by independent institutions. You can rely on us!

Temperature stability
Our policy of manufacturing our own housings enables us to optimally coordinate all components of our refrigerators and freezers. This is why we have become a world leader in temperature stability, which has been confirmed by numerous validations at customer premises. The reason is that we only manufacture products that are proven to fulfill the most stringent requirements.

Sustainability
is a trademark of our products and manufacturing process. All products are designed for a long service life. If one of our products is nearing the end of its service life, our credo is “repair not replace”. We maintain a supply of spare parts for many years. This helps to relieve the burden on your budget and on our planet’s resources.

Discover our products that are coupled with experience and innovation!

Dr. Jochen Kopitzke
Owner and CEO

1967 KIRSCH becomes one of the first manufacturer of pharmaceutical refrigerators

1980s Blood bank refrigerators and blood plasma freezers are manufactured

1990s Explosion-proof laboratory refrigerators and freezers are developed

2000 Offenburg manufacturing site is modernised and expanded

Today KIRSCH is the leading quality manufacturer of refrigerators and freezers for the laboratory and health sector
Benefit from reliability and efficiency.

Why is it worth investing in KIRSCH refrigerators and freezers? Because we use the experience we have gained worldwide to manufacture refrigerators according to the most stringent quality, functionality and efficiency requirements. Your benefit: systems you can rely on 100% - because we know about the sensitivity of the goods you need to cool.

Robust housing
Made from rust-proof, galvanised sheet steel with robust, white powder coating.

Thick insulation
Made from environmentally friendly material. Ensures low energy consumption.

Easy-to-maintain interior container
Manufactured from smooth aluminium with protective coating or from impact-resistant plastic with moulded-in shelves.

Flexible handling of drawers
Variable drawer arrangement at 15-mm intervals for refrigerators and freezers with an aluminium interior container.

Automatic defrosting
The unique rapid defrosting by Kirsch defrosts the device without violating the applicable standards for the storage of blood plasma.
Precise controls
To accurately maintain the temperature that is required by the standard for blood storage.

Forced-air cooling
All our models are equipped with forced-air cooling. This reduces the physically induced temperature drop and enables an almost constant temperature to be maintained.

Comfortable access
Now you no longer have to jerk doors open - all you need is one finger! (For models with aluminium interior containers.)

Self-closing doors
Doors left open accidentally are a thing of the past (except BL-100 and FROSTER-BL-650.)

Custom door stop
The door stop on the lockable door is normally on the right-hand side but can be fitted to the left-hand side even after installation. There is no overhang when opening the door. The plastic magnetic seal frame is easy to replace.

Company certified by TÜV SÜD Management Service GmbH according to ISO 9001:2008
Simple to operate and safe.

Our systems are controlled by microprocessors. This enables exact temperature control using safety devices in the case of malfunctions. The operation is intuitive for a smooth and easy control of our refrigerators and freezers.

**Always visible**
The easy-to-read LED display informs you about the temperature of the goods to be cooled and the system’s operating state.

**Automatic defrosting**
Defrosting takes place automatically and includes time and temperature monitoring. The condensate evaporates automatically.

**Temperature documentation**
The RS485 interface together with the optional KIRSCH-PC-KIT allows the system to be connected to a PC or network. You can benefit from automated temperature documentation or decentralised monitoring of the system status.

**Memory**
The minimum/maximum temperature memory captures the lowest and highest value since the re-start or the last time the memory was reset. The memory starts after the target temperature has been reached for the first time.

**Warning functions**
Visual and audible alarm signals are used in case of temperature deviations and other malfunctions. Even in the case of a power failure, the monitoring unit remains operational for up to 72 hours on battery power. The potential-free contact can forward alarms to e.g., your mobile phone* or a control centre.

**Antifreeze**
The goods to be cooled are protected against the temperature falling below freezing point.

**Controls**
The electronic, microprocessor-based temperature controller is equipped with a manipulation-protected control centre with membrane keyboard.

*when used together with the optional GSM Module.
Blood Bank Refrigerators manufactured in accordance with DIN 58371

Our Blood Bank Refrigerators fulfill the DIN 58371. This DIN requires for example:

- Operating temperature from +3 °C to +5 °C
- Ambient temperature at the place of installation from +10 °C to +35 °C
- Inside temperature must be monitored (e.g. in case of door openings, power failure, loading cycle or defrosting)
- Easy to clean resp. to disinfect inside chamber
- The racks must be able to withstand a uniform load of 100 kg/m²
- Refrigerator doors can be locked
- Power failure alarm for a minimum of 12 hours
- Visual and audible warning system in case of temperature deviation (upper warning limit +6 °C, lower warning limit +2 °C)
- Potential-free contact for alarm transmission
- Safety device to prevent the blood bags cooling below +2 °C

Blood Plasma Freezers manufactured in accordance with DIN 58375

This DIN requires for example:

- Setpoint of at least -30 °C, in case of automatic defrost system the plasma temperature must be kept not warmer than -27 °C
- Ambient temperature at the place of installation from +16 °C to +32 °C
- Inside temperature must be monitored (e.g., in case of door openings, power failure, loading cycle or defrosting)
- Interior is easy to clean and disinfect
- The racks must be able to withstand a uniform load of 100 kg/m²
- Freezer doors can be locked
- Power failure alarm
- Visual and audible warning system in case of temperature deviation
- Potential-free contact for alarm transmission

Uniform temperature distribution

KIRSCH forced-air cooling generates uniform air circulation in the refrigerating room. The set interior temperature is always achieved very quickly - significantly more quickly than with static cooling. Forced-air cooling ensures a unified storage temperature in the entire refrigerating room. The cooling system is optimised for each system and consists of a coordinated combination of blower and air baffle.
Temperature measurement with log file for an optimum quality control.

KIRSCH refrigerators and freezers are used in demanding storage settings (e.g., pharmaceutical research, pharmaceutical manufacturing, bioengineering, health, etc.). Temperature measurement with log file enables you to prove that our products fulfill the requirements in real-life applications (validation, such as IQ, OQ, PQ, etc.).

Extensive tests and precise calibration

Before our products are ready for market, they are exposed to the widest range of exterior conditions in the climate chamber to guarantee that the temperature can be maintained even under extreme circumstances. Before we deliver our systems, they undergo precise calibration during a default test run lasting several hours.

The combination of forced-air cooling and temperature control ensures an almost constant cooling temperature in the entire interior, even in the case of changing ambient temperatures.

Our product innovations

Highest technology “Made in Germany”. True to our credo of “Quality and Innovation since 1865”, we embrace the consistent evolution of our products. Discover the benefits of our new product design and further innovations.

Display
The display is positioned at eye-level to make it easier to read and simplify operation.

Glass door
The latest designed glass doors now also offer comfortable access.

Ventilation grid
The wide ventilation openings provide easy cleaning and improve the flow of air in the refrigerating machine room.

Self-closing door
Doors left open accidentally are a thing of the past. (Except BL-100, FROSTER-BL-650).
Controls
The modified symbols and colour scheme make the system even more intuitive to operate.

Control screen
Thanks to a new structure, it is easier to clean and promotes hygiene.

Ventilation slits
The plastic slits improve the refrigerating machine's ventilation and are easy to clean. It is now easier to integrate the systems into a clean room or existing furniture.
Blood Bank Refrigerator BL-100

2 drawers

Forced-air cooling

Standalone or undercounter installation

Automatic defrosting

Key switch

Condensate evaporation

Minimum/maximum temperature memory

Connection for forwarding alarms and for PC-supported temperature documentation

Antifreeze

Visual and audible alarm signal, even in the case of power failure

Digital temperature display

Easy-to-clean ventilation slits
Large, smooth lamellas for easy cleaning of the ventilation slits.

Standalone or undercounter installation
The standard ventilation grid allows easy installation in functional furniture.

The installation drawing is available under www.kirsch-medical.com for each model in the download area.
According to DIN 58371

- **Capacity**: 95 litres
- **Temperature setting**: +4 °C
- **Voltage**: 220 - 240 V, 50/60 Hz
- **Power consumption**: 160 watts
- **Normal consumption**: 0.85 kWh/24 h
- **Admissible ambient temperature**: from +10 °C to +38 °C
- **Heat emission (max.)**: 227 watts
- **Overall dimensions (including distance from wall)**: w x d x h = 54 x 53.5 x 82 cm
- **Interior dimensions**: w x d x h = 44 x 43 x 47 cm (usable width 2 cm, usable depth 5 cm, usable height 8 cm less)
- **Exterior dimensions with door open at 90°**: w x d = 54 x 106 cm
- **Drawer inner dimensions**: w x d x h = 37 x 32 x 10 cm
- **Max. load drawer**: 25 kg
- **Weight**: Net weight 46 kg, gross weight 50 kg

Optional equipment:

- **Glass door with lock**.
- **Tabletop** (exterior dimensions: 85 cm in height).
- **Decorative door frame** for attaching the customer’s decorative plates (exterior dimensions: 55 cm in width).
- **Door fitting**.
- **Equipped with castors**.
- **Condensate container** can be emptied manually if no condensation is required (e.g., in an operating theatre).
- **GSM-Module** for alarm text message transmission (e.g., to a mobile phone).
- **Temperature documentation**:
  - PC-KIT-NET, PC-KIT-USB-MONITORING or PC-KIT-STICK including software for temperature documentation.
  - 4-pin PT 100 or PT 1000 temperature sensor, class 1/3 B, including built-in reference body.
  - Disc-type pen recording thermometer, with 7-day measuring cycle, incorporated, with 100 recording discs and 5 felt tip pens.
  - Mechanical pen-recording thermometer with two waxed paper strips.

Blood Bank Refrigerator BL-176

**Antifreeze**

**Comfortable access**

**Minimum/maximum temperature memory**

**Visual and audible alarm signal, even in the case of power failure**

**Connection for forwarding alarms and for PC-supported temperature documentation**

**Self-closing doors**

Doors left open accidentally are a thing of the past. (Except BL-100, FROSTER-BL-650).

**Ventilation slits**

Improve the refrigerating machine’s ventilation and are easy to clean. Simplifies the integration of the devices in a clean room or into furniture.

**Digital temperature display**

**Key switch**

**Forced-air cooling**

**2 drawers**

**Automatic defrosting**

**Condensate evaporation**
BL-176
according to DIN 58371

- **External housing** made from galvanised sheet steel (rust-proof), with white, anti-scratch powder coating. Length of the plug cable: approx. 1.8 m.
- **Adjustable feet** to compensate uneven floors.
- **Interior** made from smooth aluminium with colourless protective coating.
- **Interior consists** of two aluminium-drawers on telescopic runners with stops. Stacking height: 23 cm. Capacity per drawer app. 25 blood bags, each 500 ml size.
- **Extra-thick 70-mm insulation**, made from high-quality, compression-moulded and environmentally friendly material. Energy saving.
- **Self-closing door** with easy-to-replace plastic magnetic seal frame, lockable.
- **Door stop** on the right-hand side (by default, see illustration), or the left-hand side, can be retrofitted.
- **Forced-air cooling** with axial blower, switches off automatically when you open the door, ensures a uniform temperature and minimizes temperature deviations.
- **Automatic defrosting** with time limit and temperature monitoring.

**Condensate evaporation** in the refrigerating machine room.

**Key switch** protected control panel against tampering. Membrane keyboard with digital temperature display and minimum/maximum temperature memory.

**Warning functions** with visual and audible alarm signal in the case of temperature deviation and power failure. In the case of power failure, the monitoring unit remains in operation for approx. 72 hours on battery power. Door open alarm after 60 seconds.

**Alarms** can be forwarded using the potential-free contact (e.g., to a mobile phone with optional GSM-Module or to a control centre).

**RS485 interface** for connecting to PC-supported temperature documentation (using the optional KIRSCH-PC-KIT).

**Antifreeze** against sub-zero temperatures.

**Statically ventilated refrigerating machine**, vibration free, hermetically sealed, energy saving, low noise, easy to service.

- **Shelf** w x d = 52.7 x 39 cm on rails or overlays (max. load: 40 kg).
- **Condensate container** can be emptied manually if no condensation is required (e.g., in an operating theatre).
- **GSM-Module** for alarm text message transmission (e.g., to a mobile phone).
- **Temperature documentation:**
  - PC-KIT-NET, PC-KIT-USB-MONITORING or PC-KIT-STICK including software for temperature documentation.
  - 4-pin PT 100 or PT 1000 temperature sensor, class 1/3 B, including built-in reference body.
  - Disc-type pen recording thermometer, with 7-day measuring cycle, incorporated, with 100 recording discs and 5 felt tip pens.
  - Mechanical pen-recording thermometer with two waxed paper strips.
Clean
Control screen made of plastic with smooth surface for promoting hygiene.

18

Perspective
The optional equipment with a glass door and LED-illumination avoids unnecessary door opening.
BL-520
according to DIN 58371

- **External housing** made from galvanised sheet steel (rust-proof), with white, anti-scratch powder coating. Length of the plug cable: approx. 3 m.
- **Adjustable feet** to compensate uneven floors.
- **Interior** made from smooth aluminium with colourless protective coating. Gibs (every 15 mm) for flexible interior arrangement.
- **Interior consists** of five aluminium-drawers, height adjustable on telescopic runners with stops. Stacking height: 23 cm. Capacity per drawer app. 30 blood bags, each 500 ml size.
- **Extra-thick 70-mm insulation**, made from high-quality, compression-moulded and environmentally friendly material. Energy saving.
- **Self-closing door** with easy-to-replace plastic magnetic seal frame, lockable.
- **Door stop** on the right-hand side (by default, see illustration), or the left-hand side, can be retrofitted.
- **Forced-air cooling** with axial blower, switches off automatically when you open the door, ensures a uniform temperature and minimizes temperature deviations.
- **Automatic fast defrosting** thanks to time-limited and temperature-monitored reversal of the refrigerant circuit.
- **Condensate evaporates** in stainless steel heated dish beneath the refrigerator floor.
- **Key switch** protected control panel against tampering. Membrane keyboard with digital temperature display and minimum/maximum temperature memory.
- **Warning functions** with visual and audible alarm signal in the case of temperature deviation and power failure. In the case of power failure, the monitoring unit remains in operation for approx. 72 hours on battery power. Door open alarm after 60 seconds.
- **Alarms** can be forwarded using a potential-free contact (e.g., to a mobile phone with optional GSM-Module or to a control centre).
- **RS485 interface** for connecting to PC-supported temperature documentation (using the optional KIRSCH-PC-KIT).
- **Antifreeze** against sub-zero temperatures.
- **Ventilation-enforced refrigerating machine**, vibration free, hermetically sealed, energy saving, low noise, easy to service. Inlet and exhaust air flow through the ventilation slits at the front.

- **Cooling machine** with cold water connection.
- **Outer housing** in stainless steel 4301, longitudinal brushed.
- **Additional drawer** made of aluminium.
- **Drawers insert** (set) with 4 adjustable length and 25 (FROSTER-BL-530) or 40 (FROSTER-BL-730) cross dividers per drawer.
- **Additional length and cross dividers.**
- **Drawer** made of stainless steel, also possible with cover plate, black colored, instead of aluminum.
- **Shelf** w x d = 59.7 x 45 cm on rails or overlays.
- **Baskets** on rails w x d x h = 60 x 45 x 10 cm.
- **Aluminium-tray** with rails w x d x h = 60 x 40 x 2.5 cm.
- **GSM-Module** for alarm text message transmission.
- **Temperature documentation:**
  - PC-KIT-NET, PC-KIT-USB-MONITORING or PC-KIT-STICK including software for temperature documentation.
  - 4-pin PT 100 or PT 1000 temperature sensor, class 1/3 B, including built-in reference body.
  - Disc-type pen recording thermometer, with 7-day measuring cycle, incorporated, with 100 recording discs and 5 felt tip pens.
  - Mechanical pen-recording thermometer with two waxed paper strips.
Visual and audible alarm signal, even in the case of power failure

Minimum/maximum temperature memory

Connection for forwarding alarms and for PC-supported temperature documentation

Comfortable access

Constant temperature
With the high-capacity, two-stage cooling machine the storage temperature is maintained even after frequent door openings. This will protect your stored blood plasma.

Interior
Interior consists of stainless steel-drawers with cover plate.

Forced-air cooling

5 drawers with cover plate

Automatic fast defrosting

Key switch

Condensate evaporation

Digital temperature display
FROSTER-BL-650 according to DIN 58375

- **External housing** made from galvanised sheet steel (rust-proof), with white, anti-scratch powder coating. Length of the plug cable: approx. 2 m.
- **Interior made** from smooth aluminium with colourless protective coating.
- **Interior consists** of five stainless steel-drawers with cover plate on fixed mounted, smooth rolling, ball-bearing stainless steel telescopic runners. Stacking height: 21 cm. Capacity per drawer app. 64 plasma cartons (w x d x h = 19 x 13 x 2.5 cm), each 400 ml size.
- **Extra-thick 100-mm insulation**, made from high-quality, compression-moulded and environmentally friendly material. Energy saving.
- **Door** with easy-to-replace plastic magnetic seal frame, lockable.
- **Door stop** on the right-hand side (see illustration), the left-hand side is not available.
- **Forced-air cooling** with axial blower, switches off automatically when you open the door, ensures a uniform temperature and minimizes temperature deviations.

- **Automatic fast defrosting** thanks to time-limited and temperature-monitored reversal of the refrigerant circuit.
- **Condensate evaporates** in stainless steel heated dish beneath the refrigerator floor.
- **Key switch** protected control panel against tampering. Membrane keyboard with digital temperature display and minimum/maximum temperature memory.
- **Warning functions** with visual and audible alarm signal in the case of temperature deviation and power failure. In the case of power failure, the monitoring unit remains in operation for approx. 72 hours on battery power. Door open alarm after 60 seconds.
- **Alarms** can be forwarded using the potential-free contact (e.g., to a mobile phone with optional GSM-Module or to a control centre).
- **RS485 interface** for connecting to PC-supported temperature documentation (using the optional KIRSCH-PC-KIT).
- **Double stage refrigerating machine**, ventilation-enforced, vibration free, hermetically sealed, energy saving, low noise, easy to service. Inlet air and exhaust air flow through the ventilation slits at the front.

### Optional equipment

- **GSM-Module** for alarm text message transmission.
- **Temperature documentation:**
  - PC-KIT-NET, PC-KIT-USB-MONITORING or PC-KIT-STICK including software for temperature documentation.
  - 4-pin PT 100 or PT 1000 temperature sensor, class 1/3 B, including built-in reference body.
  - Disc-type pen recording thermometer, with 7-day measuring cycle, incorporated, with 100 recording discs and 5 felt tip pens.
Accessories for expanding the functionality of your refrigerators and freezers.

Use our practical accessories to expand the feature set of your KIRSCH refrigerator or freezer. Whether it is the PC-KIT for temperature documentation, or the GSM-Module for forwarding alarms to your mobile phone, or other structural options - we have what you need.

**Optional accessories**

The KIRSCH-PC-KIT in conjunction with KIRSCH-DATANET (scope of delivery) enables:

- Complete documentation at minimal costs using a commercially available PC
- Real-time system monitoring*
- Using a PC for configuring the refrigerator/freezer*

The PC-KIT is available in 3 versions, each with a specific data transfer option.

### KIRSCH PC-KIT

**Complete temperature documentation**

Manual on-site data capture is time consuming and often imprecise. Use our solutions to deal with these tasks simply and quickly - whether with the KIRSCH-PC-KIT or our more traditional mechanical thermometers.

»[...] Blood products must be stored in applicable cooling devices or storage rooms which are suitable for this purpose [...] and they must feature appropriate measuring, registration and alarm systems for temperature and function monitoring [...]. All storage temperatures have to be documented [...]“

Excerpt from the „Guidelines on the Production of Blood and Blood Fractions and on the Use of Blood Products (Haemotherapy)“, as drawn up by the Federal Association of Practising Physicians, 2005.

If no general recording system is available we recommend one of our optional methods for consistent temperature documentation, which can be integrated during the production of the refrigerator or freezer upon request or which can be ordered as an upgrade at an extra cost.

**KIRSCH-DATALOG**

External temperature recording

Temperature sensor that can be retrofitted for external connection to PC-supported temperature evaluation devices (e.g., KIRSCH-DATALOG).

If older KIRSCH models without RS485 interface or to integrate third-party products, you can retrofit the temperature documentation using KIRSCH-DATALOG.

### Thermometer

If you prefer the mechanical temperature capture method instead of the PC-supported one, you can use our disc-type thermometer or the pen-recording thermometer.
Automatic temperature documentation and monitoring using LAN or Wi-Fi**. Connect as many machines as desired. Up to 3 users can access the data simultaneously. Server-ready.

**PC-KIT-USB-MONITORING**
Automatic temperature documentation and monitoring using a USB cable for up to 32 machines. Single workstation version.

**PC-KIT-STICK**
The easiest method for electronic temperature documentation using a USB-stick. Permanent documentation, even while data is being read.

**Disc-type thermometer**
Depending on the model, this is either installed into the machine room screen of the refrigerator or freezer or integrated into an additional housing add-on.

**Pen-recording thermometer**
The easiest method to retrofit temperature documentation.

* excluding PC-KIT-STICK
** with commercially available Wi-Fi adapter

See [www.kirsch-medical.com](http://www.kirsch-medical.com) for more information on temperature documentation in our separate information package.
Technical options

KIRSCH refrigerators and freezers provide numerous interior design options that can be retrofitted even when the machine has already been installed.

Text message alarm forwarding

The GSM-Module is used to forward alarm text messages to a mobile or landline phone network. This requires an activated SIM card and sufficient reception at the installation location.

Connect the GSM-Module using the potential-free contact. Reaching the alarm limits triggers a visual and audible signal at the GSM-Module and the sending of an alarm text message.

Optional accessories

- Glass door with lock
  Avoid opening the door unnecessarily to inspect the contents. Can be locked.

- Side wall/ceiling interior lighting
  Optional, optimal and energy-efficient lighting for the interior using an LED light strip.

- Water-cooled refrigerating machine
  For special cases, refrigerating machines with heat exchangers for cold-water connection are available for some models.

- Transportable design
  Equipped with steering and fixed castors.

- Condensation containers
  Transparent, for manual emptying.

- Stainless steel shelves and wire shelves
  Stainless steel shelves - guaranteed rust-free, and wire shelves, PE coated, robust with load capacity of up to 40 kg.

- Drawers
  Optimised per model, some are height adjustable.

- Length and cross dividers for drawers
  For the most possible variability.
Our service - your benefit

Competent advice
Do you have any questions about our products? We can offer you professional advice. Because our service is as reliable as our products. We are looking forward to your call!

24/7 customer services
Faults must be rectified as soon as possible. For this reason, we work with BOSCH customer services as our service partner. Professional staff are on hand 24 hours a day, 7 days a week. Furthermore, one of the 600 highly trained technicians will be pleased to solve your problem on site.

An overview of your benefits:
- 24-hour availability, 7 days a week,
- Fast response thanks to an extensive service network,
- Specialised, continuously trained expert staff,
- Certified according to DIN ISO 9001.

*Regional call rates apply. Order acceptance to the regular business hours: (Mo.-Th. 8:00 am to 12:15 pm / 13:15 pm to 16:30 pm; Fr. 8:00 am to 12:00 pm).
We have taken the greatest care to describe our systems to our customers as clearly as possible in this catalogue. Nevertheless further questions may arise in everyday use, in particular when dealing with high-quality technical products. In such an instance, please do not hesitate to call us; we will be happy to assist you. We are also constantly working on evolving all product types and models. Therefore, we kindly ask for your understanding that shape, design and technology of our systems are subject to change.
